

All products are quoted as FOB, Ashland, OH as freight is added to the invoice or the customer can arrange transportation.

1) **RP1410**

White window formulation, optically sorted to ensure purity, pulverized and large lot blended to provide consistency throughout the blend. Color values are modified to match customer specifications while maintaining high impact values [>3.0 in-lbs. /mil] and excellent surface qualities. Demonstrated application fit for window, fencing, decking and custom profiles with or without a capstock as well as the replacement of virgin formulations.

2) **RP1010**

Blended PVC white formulation, optically sorted to ensure white purity, pulverized and large lot blended to provide consistency throughout the blend. Color values are modified to match customer specifications while maintaining high impact values [>3.0 in-lbs./mil] and excellent surface qualities. Demonstrated application fit for window, fencing, decking and custom profiles without or without a capstock as well as the replacement of virgin formulations.

3) **RP1040**

Blended earth tone PVC formulation, pulverized and large lot blended to provide consistency throughout the blend. Color values are modified to match customer specifications while maintaining high impact values [>3.0 in-lbs./mil] and excellent surface qualities. Demonstrated application fit for window, fencing, decking and custom profiles without or without a capstock as well as the replacement of virgin formulations.

*****RP1010 and RP1040 are available in a delayed fusion version RP1100 and RP1140.**

4) **RP2000**

Blended light grey or earth tone PVC formulation, pulverized and large lot blended to provide consistency throughout the blend. Typically has medium to high impact values and moderate surface qualities. Demonstrated application fit in fencing, decking, conduit, custom applications as a substrate or process aid with or without capstock.

*****RP2000 is available in a UL recognized component version identified as RP2008.**

5) **RP2500**

Blended PVC formulation, pulverized and large lot blended to provide consistency throughout the blend. Typically has medium to low impact values. Demonstrated application fit in fencing, decking, pipe, custom applications as a substrate or process aid with a capstock.

*****All products are available in a GreenCircle™ Third Party Certified product. See Announcement.**
